Summary

12 Years of overall Information technology experience with a strong focus on modern front-end and full-stack applications, with expertise in Javascript/Typescript
An avid learner, highly optimistic, and driven to deliver customer values.
Worked as the lead in multiple projects for around 4 consecutive years with an above 90% average client satisfaction index. Delivered value by removing friction between cross-functional teams and guided team members to achieve quality outcomes.
Dedicated to writing clear, concise, robust code that works with great focus on test-driven development and incorporating Software Development Life Cycle (SDLC), Mentoring/Coaching, and Agile/Scrum Development.
Experienced with full life-cycle product development and product management including requirements capture, prototyping, proof of concept, design, implementation, testing, releasing, and operation and apart from this have a rich experience in interacting with various SMS's and stakeholders for ex, design team, BAs, leadership and communicating clear goals and tasks.
As an engineering manager and a technical leader, I aspire to be a part of a team(build) that is driven by a passion to deliver great user experiences.
Key Technical Skills: JavaScript/TypeScript, ReactJS, React native, Angular, Android, Styled Components, Jest, Cypress (Automation, TDD, e2e, Quality Assurance), nodejs, Web services REST/GraphQL, mono repo, lerna, postgres, mongo db AWS, Microsoft Azure
Tools: Git, Github, Bitbucket, CircleCI, Azure Devops, Visual Code, npm, yarn, linux

Experience

Associate Consultant

Tata Consultancy Services

Jan 2021 - Present (8 months +)

Working as a full stack lead for a client(start-up) and managing a team of around 7-8 engineers in areas of react, nodejs, graphql, postgres, cypress and CI/CD and along with that drove the team on code quality and continous delivery and deployment.
After joining this team, increased team's capacity by around 20% by reducing tech debt, setting up coding guidelines, reusable assets and regular mentoring sessions.
Major contribution is to conceptualise and set up design system for overall solution for continuous design assets delivery using standard tools such as design tokens, styled components etc.

Assistant Consultant

Tata Consultancy Services

stack lead to deliver a customer-facing application deployed on
AWS.
• Role: React native development, test-driven approach, Jest, React native testing library, integration with AWS GraphQL, Schema design
• Workedinagilemethodologywiththeclient,ensuredqualityend-sprintdemosand delivered full solution which garnered high ratings.

• Technologies: Google Cloud APIs, AWS Ampliy, GraphQL, React Native, ReactJS, NestJS, Postgres

Assistant Consultant

Tata Consultancy Services

Jun 2020 - Feb 2021 (9 months)

Worked as a full-stack lead to deliver a customer-facing application deployed on AWS.

Role: React native development, test-driven approach, Jest, React native testing library, integration with AWS GraphQL, Schema design

Worked in agile methodology with the client, ensured quality end-sprint demos and delivered full solution which garnered high ratings.

Technologies: Google Cloud APIs, AWS Ampliy, GraphQL, React Native, ReactJS, NestJS, Postgres, Mongo, Microsoft App Center, Docker

Assistant Consultant

Tata Consultancy Services

Aug 2017 - Jun 2020 (2 years 11 months)

Worked as a UI Architect on a highly complex, multi-platform quality application over the cloud for a cement domain.

Role: Authentication implementation in web, iOS and Android, data modelling, state management, offline synchronisation module using abstraction in iOS and Android. ML based OCR in native applications.

Technologies involved: Openshift, Angular, Google Firebase, .net core

Worked for major power and heavy electrical equipment manufacturer: Track and Trace solutions for products

Role: UI Architect/Team Lead, DevOps, Azure Cloud Management Technologies Involved: Azure, Angular 6, Xamarin Forms

Conducted on-site workshops with customers for requirement gathering and technology mapping.

Worked for a leading abrasive products manufacturer: Instrument parameter calculator application

Developed a Hybrid application using Ionic/Angular for cross-platform development.

Role: Tech Lead and senior developer Technologies involved: Ionic framework, nodejs, npm

Information Technology Analyst

Tata Consultancy Services

Aug 2015 - Aug 2017 (2 years 1 month)

Led Mobility App factory Model team on requirement gathering, technical solution designing, and architecture for an affordable housing development solution

Responsible for Full stack implementation of native android application along with Google Firebase as back-end which used server-less architecture

Developed an application for promoting health and safety on missed incident tracking system leveraging mobile native features, offline and workflows.

Mentored team on the delivery of technical solution for development on various platforms - iOS, android, and web application.

Technical Officer
Centre for Development of Advanced Computing
Aug 2010 - Aug 2015 (5 years 1 month)
Worked on design and development of hardware sensor boards with master/slave
devices onboarded with android OS. Responsible for OS Customisation and
deployment in field to achieve real use cases in agriculture.
• Part of a team which developed an interactive e-learning solution consisting of
smart board, AR based android application. Responsible for image processing
modules, android AR library, backend development

Education

Rajiv Gandhi Technical University (University of Technology of Madhya Pradesh)
BACHELOR OF ELECTRONICS AND COMMUNICATION ENGINEERING

Licenses & Certifications

Diploma in Embedded Systems - CDAC Bangalore

Product Management Nano Degree - Udacity
LJRNGLKZ

Skills

React.js • React Native • Angular • Docker Products • Node.js • GraphQL • Cypress • Product
Management • NestJS • Linux

Honors & Awards

Learning Achievement Award - Tata Consultancy Services
Feb 2021
Won learning and hackathon competition in unit

Technical Excellence Award - Tata Consultancy Services
Jul 2020
For leading a full stack team, design loosely coupled architecture and delivering the project with high
quality and mentoring the team

Technical Excellence Award - Tata Consultancy Services
Aug 2019
Received award for taking ownership, identifying key areas to work on and set base framework for team
to work on
